

Training Course on Energy Audit and Energy Conservation

Macau
5 & 6 December 2008

With the coordination by the Office for the Development of Energy Sector (GDSE) in Macau, we successfully conducted a two-day "Training Course on Energy Audit and Energy Conservation" in Macau on December 5 & 6, 2008. The seats were fully filled with more than 40 participants. That was a wonderful event for EI(HK) to share our international and Hong Kong experiences in energy efficiency with our friends in Macau. The course was well received. We also met with professionals in the energy and environmental industry in Macau for a valuable professional exchange.

We are invited to conduct the course again in Macau in the near future. We of course look forward to offering our services again in Macau. We also look forward to organising more activities outside Hong Kong for more professional and academic exchange on energy related matters.

Michael K.H. Leung
Chairman, EI(HK)
