Technical Tour and Outing: Green Junk Ride and Eco-Tour

Aviva Green Junk is the first junk in Hong Kong fully equipped with various state-of-the-art energy-efficiency and renewable energy devices. On 13 June 2009, EI(HK) organised a cruise riding on the Aviva Green Junk to Lamma Island. There were 28 EI Members, Family Members and Friends participating in the tour. In this tour, the participants learned more about practical uses of available green technologies, including biodiesel, photovoltaics (PV), micro wind turbines, heat pump water heater/air-conditioner, LED lighting and more. On Lamma Island, we took a hike along the Eco-tour route from Yung Shue Wan Ferry Pier to Sok Kwu Wan Ferry Pier. It was a nice day for hiking. It took about 1.5 hours to finish the walk. What a good exercise together with the beautiful green scenery. After a delicious lunch in a seafood restaurant, we were all content and then took a ride back on the Green Junk. We all agree to organise similar tours more often.
