

## Energy Institute (Hong Kong Branch) 能源學會(香港分會)

### Report on Seminar on “Let's Build a Smarter Planet - a Smart Building is a Green Building” on 24 November 2010

The Energy Institute (Hong Kong Branch) had organized the Seminar on “Let's Build a Smarter Planet - a Smart Building is a Green Building” on 24 November 2010 with supports from The American Society of Heating, Refrigerating and Air-Conditioning Engineers Hong Kong Chapter, The Hong Kong Association of Energy Engineers, The Gas & Energy Division, Hong Kong Institution of Engineers, The Institution of Mechanical Engineers (Hong Kong Branch) and The Society of Operations Engineers (Hong Kong Region).

We had invited Mr Daniel Leung, IBM Certified Architect, Technical Solution Manager for General Business of the IBM Greater China Group to deliver a presentation at the seminar on the latest technologies that can enable developers, facilities & property management, engineers and consultants to rethink the way they should design, build and manage the buildings sustainably and build smarter buildings for a smarter planet. The seminar was successful in attracting around 100 members and guests to attend and share the experience in this topic.

It was a fruitful evening for all EI's members and their guests who had benefited from the talk.
