## **Engagement Workshop for Response to: “Hong Kong’s Climate Change Strategy and Action Agenda”**

### **Introduction**

The impact arising from Climate Change is affecting our daily lives as well as future generations in Hong Kong. The Hong Kong Association of Energy Engineers (HKAEE) in conjunction with the Association of Energy Engineers, Hong Kong Chapter (AEE-HKC) bears a view that it is very much our interest to participate in the necessary inputs in the formulation of strategies to combat climate change. We welcome the public consultation launched by the Government, in which the consultation document of “Hong Kong’s Climate Change Strategy and Action Agenda” can act as a comprehensive framework for us to express our views.

HKAEE/AEE-HKC with the support from our supporting sister professional organizations will hold a workshop as a platform for gathering your view in response to those nine (9) key consultation points in the document. The workshop will be undertaken by way of focus group discussions with facilitators assigned. HKAEE/AEE-HKC will give a briefing on the consultation document to the participants. Notwithstanding to those questions, any of your views, suggested measures/strategies to address the climate changes impact are welcomed. Your attendance to this workshop is most valuable and essential for us to subsequently consolidate your views and recommendations to the Government.
