17 December 2011 (Saturday)

## **Report on *Technical Visit to “Permanent Aviation Fuel Facility”***

A group of 25 persons from the Energy Institute (Hong Kong Branch) had visited the ***Permanent Aviation Fuel Facility*** (PAFF) in Tuen Mun arranged by the ECO Aviation Fuel Services Limited in a sunny morning on 17 December 2011.

With special thanks to a detailed introduction on design and safety systems of the PAFF and related issues by their Plant Manager, Mr. Chris Tam, a tour around the facility was arranged after the briefing. Members were able to have an interactive discussion with Mr. Tam during the tour which enabled the visitors to learn more about PAFF’s operations.

The Visit was ended with group photo-taking and souvenir presentation to Mr. Tam by EIHK Chairman, Mr. Raymond Fong.

An enjoyable and fruitful trip which EIHK must thank again the ECO Aviation Fuel Services Limited for arranging the Visit for us!
