CERTIFIED CARBON AUDITOR TRAINING COURSE

(24th Intake)

3 – 6 December 2025

Supporting Organisations

(TBC)

(TBC)

Background

The emissions of carbon dioxide (CO₂) and other greenhouse gases (GHG) due to power generation, transportation and other industrial / commercial activities are contributing to climate change and environmental impacts worldwide. Each corporation should immediately implement carbon-reducing measures to mitigate the problems. The first important step is to carry out a carbon audit to identify the sources of carbon emissions and quantify the carbon footprint of a corporation. As energy consumption is one of the major sources of carbon emissions, it is always effective to reduce carbon footprint through implementing energy saving measures.

As an active professional institution and one of the green partners in Hong Kong, the Energy Institute is active in providing timely and quality certified carbon auditor courses to train engineers and other professionals to understand the audit process and to acquire the necessary skills to conduct professional carbon audits.

Course Objectives

The Certified Carbon Auditor Training Course is designed for engineers and other professionals who have an interest or involvement with greenhouse gas accounting, reporting and management in Hong Kong. After taking the course, the participants will be able to:

- Appreciate the function of carbon audits as a means to help business sectors and corporations in estimating their carbon (greenhouse gas) footprints thereby setting objectives to manage and reduce the footprints;
- Understand the basic carbon audit processes and learn the skills to undertake such audit, with an appreciation of Hong Kong's requirements in carbon auditing; and
- Establish network in the carbon business through certification as certified carbon auditor with the Energy Institute in UK, which has a membership of over 14,000 individuals and 300 companies all over the world.

The course will suit those with no or limited GHG accounting experience or those wishing to gain a basic understanding of the concept of net zero emissions using science-based targets and the requirements of the Corporate Value Chain (Scope 3) Accounting and Reporting Standard.

Main Topics

1. Climate Change and Potential Local Challenges

- Energy and climate change
- Kyoto greenhouse gases

2. Greenhouse Gas Accounting and Reporting

- International GHG Corporate Accounting and Reporting Standard (produced by WRI/WBCSD)
- Setting Organisational and Operational boundaries
- Hong Kong Accounting and Reporting Guide

3. Carbon Auditing

- Carbon Auditing in Practice
- Scope 2 emissions guidance
- Organisational boundary guidance for leased assets

- Hong Kong's GHG inventory and major emission sources

- Emissions factors and calculations
- Workshop Activities – Collating and Sense checking accurate emissions data

- Workshop Activity – Carbon auditing case study exercise (*Applying the Hong Kong GHG reporting guide to a case study HK office building*)
- Preparing a greenhouse gas report

4. International Carbon Policies

- Hong Kong policy & actions
- EU & UK policy & actions
- IPCC reports

5. Energy and Carbon Management

- Energy and carbon reduction solutions
(air conditioning, lighting, motors, building facilities)
- Low & Zero Carbon technologies
- Emission reduction versus offsetting

6. Developing Carbon Accounting Practice beyond the Hong Kong GHG Guide

- Paris Agreement and COP26 commitments
- IPCC guidance on fugitive emissions
- Relevance of Scope 3 value chain emission sources
- Review of ISO 14064-1:2018 GHG organisational accounting & reporting requirements
- Concept of Science Based Targets
- Science Based Targets initiative (SBTi) Corporate Standard
- Concept of Net-zero emissions
- Basic principles of Net Zero strategies and pathways

7. Integrating Carbon Audit and Data for Green and Sustainable Finance

- Relevance in Investments
- Green Finance Products: Green bonds, loans, and ESG funds
- Carbon Trading and Regulation: ETS and CBAM

Note: Contents are subject to minor change without prior notice.

Course Delivery

The course will include a mixture of tutor led training, group discussion and delegate activities and will be assessed through a 2.5-hour online examination. Training will focus on the application of the greenhouse gas accounting and reporting guide developed by the Hong Kong SAR Government and will also cover practical carbon auditing skills.

Delegates will gain practical experience of GHG emission accounting and reporting calculations by completing a range of exercises and a case study Hong Kong office building. Participants will require MS Excel for the course case study exercise and also a laptop for the assessment.

Examination

- Participants must pass the examination and attend the introduction webinar session as well as all lectures (in webinar) in order to receive the certificate.
- The examination will be undertaken using the Energy Institute online portal.
- Examination will be 2.5 hours and comprises a mix of multi-choice, short text based and calculation questions. If a participant fails the examination, they will normally have one opportunity to re-sit the online examination. There will be no charge for the re-sit. Please note there will be no opportunity for a second re-sit. Details will be announced during the course.
- If a participant cannot take the exam on the scheduled date, one exam opportunity will be forfeited and will not be made up.

Key Speakers

Ir Andy BELL is a Chartered Mechanical Engineer (CEng., FIMechE), Chartered Energy Engineer, Chartered Energy Manager (CEng., MEI). As a former Vice Chair of the Energy Institute in Hong Kong, Andy is now Hon Sec of EI Singapore and Vice Chair of IMechE, Singapore Branches.

Andy has worked in Asia for 40 years as a professional engineer in Singapore, Manila and Hong Kong and is currently an Independent Consultant specialising in Energy, Sustainability, the Circular Economy and Rail Transport.

He worked for over 30 years in Asia Pacific running specialist teams designing, manufacturing and installing energy saving Platform Screen Door Systems on many metro systems in Asia.

Inspired by the significant energy savings made by underground platform screen door systems, Andy developed a carbon and energy management programme implemented globally in his former company and personally carried out carbon and energy audits at their many and varied company factories located in Asia Pacific, and also in UK under the government ESOS scheme.

Andy is a qualified trainer and carries out lecturing on energy and carbon, engineering and management for the Energy Institute, as well as developing existing and new courses. In addition, Andy has lectured at universities in Hong Kong and for EI at organisations such as SMU (Singapore Management University), IES (Institute of Engineers Singapore) as well as at events sponsored by KPMG, Australian Institute of Engineers, IMechE as well as teaching the Certified Energy Manager programme for AEE (Association of Energy Engineers).

His goal is to convince young people to become engineers because climate change is here now, that time is fast running out, and that we engineers are urgently needed to develop and implement the solutions to combat it.

Ir Chair Prof. Michael KH LEUNG, PhD, CEng, MEI, RPE, FHKIE, is the Past Chairman of Energy Institute Hong Kong. He is also the Shun Hing Education and Charity Fund Professor of Energy and Environment, Chair Professor of Renewable Energy in School of Energy and Environment, and Director of the Ability R&D Energy Research Centre of City University of Hong Kong. His main areas of his teaching and research are energy efficiency, renewable energy and building services engineering. He is also experienced in energy audit and carbon audit.

Ir Gary CHIANG, BEng, MEng, CEng, MHKIE, MCIBSE, MEI, REA, BEAM Pro, CESGA®, Past Chairman, Energy Institute Hong Kong Branch / Principal Manager – Business Development & Support Customer Success & Experience / Customer Success & Sales, CLP Power Hong Kong Limited.

Mr Pollex KH LAM, CEng, CEnv, MEI, BEng, MBA, CESGA, Chartered Energy Manager, is the Honorary Treasurer of the Energy Institute Hong Kong Branch. He is also the Managing Director at Lianhe Green Development Company Limited and a part-time lecturer in the School of Science and Technology at Hong Kong Metropolitan University. Additionally, he serves as an Assessor and interviewer for the Chartered Environmentalist, Chartered Energy Manager, and Chartered Energy Engineer designations at the Energy Institute - London. He has extensive experience in energy efficiency, renewable energy, carbon auditing, and carbon data assurance for sustainable finance.

General Information

Date & Time:	Introduction webinar	26 November 2025 (Wed) 19:00 – 20:00 HKT
	Lectures (<u>webinar only</u>)	26 November 2025 (Wed) 20:00 – 20:30 HKT 3 – 5 December 2025 (Wed – Fri) 13:30 – 19:30 HKT 6 December 2025 (Sat): 10:00 – 19:00 HKT
Teaching & Learning Activities:	Lectures, case study assignments and a formal examination	
Medium of Instruction:	English	
Target Participants:	Practicing Engineers, Energy Managers, Energy Auditors, Environmental Officers, Building Services Managers, Plant Managers, etc. who have no or limited GHG accounting experience and wish to understand the requirements of the Hong Kong GHG accounting and reporting guide.	
Online Examination:	The online examination will be held on 20 December 2025 (Sat) at 15:00 – 19:00 HKT . (The participants are responsible for arranging a venue with a stable internet connection by themselves during the designated time for the online assessment via the EI Learning Centre. If a participant cannot take the exam on the scheduled date, one exam opportunity will be forfeited and will not be made up.)	
Results Releasing Date:	By 16 January 2026 (Fri)	
Course Fee:	HK\$10,000 for Members of Organiser, Supporting Organisations and The Hong Kong Green Organisation Certification (HKGOC) HK\$11,000 for Non-members	
Registration:	- Please register through online system: https://bit.ly/ccatc24. A separate email will be sent to you to acknowledge the receipt of your registration and to provide you with instructions on how to pay the course fee. Your enrolment is confirmed only after we receive your payment. Limited seats are available on a first come, first served basis upon confirmation of the payment. - Last day of registration: 3 November 2025 (Mon) - The Organiser reserves the right to cancel the course in the case of low registration rate. All registrants will be informed of the cancellation and refund arrangement on or before 19 November 2025 (Wed).	
Certificate:	Certificate will be issued by Energy Institute and carry CIBSE CPD accreditation approval. (Certificate sample is attached on the next page)	
Qualification:	Completed CCATC, EIUK	
Registry:	List of persons obtaining Certified Carbon Auditor Training Certificate will be posted on EHK and EIUK website with consent from the participants who have passed the exam	
Resit Assessment (if required)	11 February 2026 (Wed) at 19:00 – 23:00 HKT (The results will be released by 4 March 2026 (Wed). If a participant cannot take the exam on the scheduled date, one exam opportunity will be forfeited and will not be made up.)	
Enquiries:	Course Secretariat Tel: 2967 8855 Email: events@agchk.com	

This is to certify that

CHAN Tai Man

has successfully completed
the Energy Institute's

Certified Carbon Auditor Training Course

on 8 - 11 June 2022

delivered virtually in partnership with

The Energy Institute Hong Kong Branch

Chris Burgess
Chris Burgess
Course Lecturer
